# Roman Krentovsky

Not ideal, but I want to become the best Front End software developer

## Summary

I'm a Front End Software Developer.

I'm skilled using Front End technologies like React, NodeJS, Webpack, CSS3, Bootstrap, HTML5, JavaScript.

I am recognized as an enthusiastic, good team player, fast learner and passionate worker in the projects where I have participated.

I love to help people and share the knowledge acquired with my partners.

I like solving complex problems, not surrendering under the vision of how much else need to be done before you finally can exhale.
